HIGHWAY PLUS
TRUCK, BUS & TRAILER PARTS

Introducing

Precision. Power. Performance.

IVECO Highway Plus ACVHP 300 products are a new range of commercial vehicle brake pads, featuring an all-new OEM-level friction compound designed for the rigours of Australian conditions.

Manufactured by one of the leading global OEM and OES friction suppliers in their world-class production facilities, this range of disc pads delivers exceptional quality, longer life and powerful performance.

New and Improved

The new HPACV 300 Series Heavy Duty Range takes strength and durability to a new level. Designed to exceed ECE R90 performance and support its Premium Plus status.

IVECO highway premium plus ACV 300 handles the heat.

Independent wear testing underlines the consistent performance and durability of this premium friction product, featuring:

- Excellent brake performance in extreme temperatures
- Enhanced braking power
- Strong brake fade and consistent recovery levels
- Reduced levels of disc rotor wear
- Consistent performance at all levels
- Excellent backing plate system providing best-in-class pad retention
- ECE R90 certification, tested to international standards
- Assists with achieving longer life

1. Bedding in Layer

Provides immediate improvement in friction performance.

2. High Quality Friction

Materials developed and independently tested to meet the demands of both commercial and light commercial vehicles.

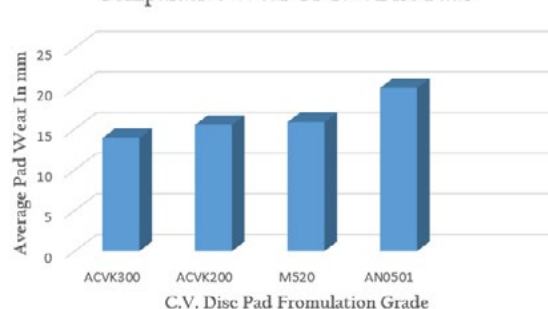

3. Friction Underlayer

Enhances bonding in critical area, increasing strength and minimising any occurrence of edge lift.

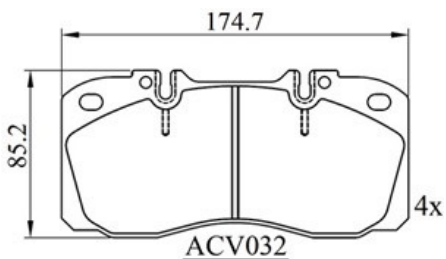

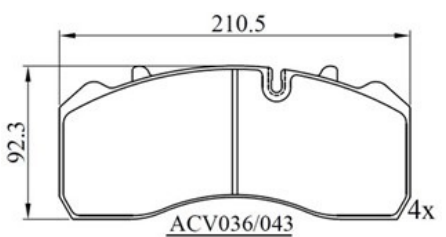

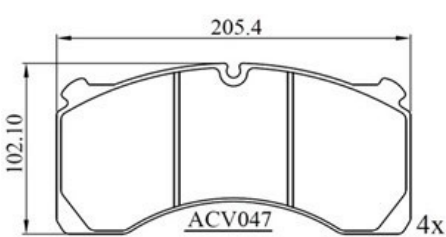

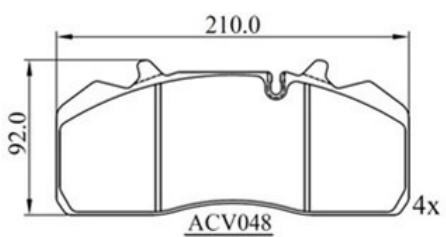

4. Mechanical Bonding

Friction material is locked to the back plate using mechanical bonding. This locked-in solution helps prevent dislodgements and failures at high temperatures.

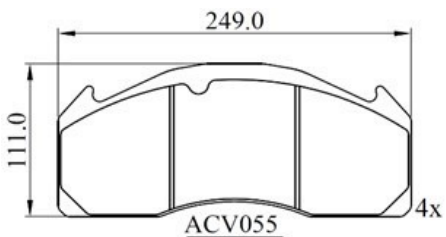

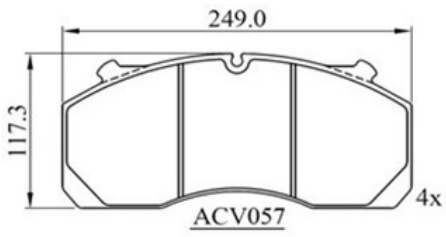

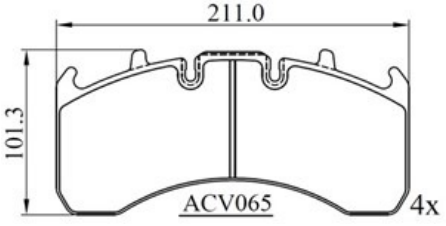

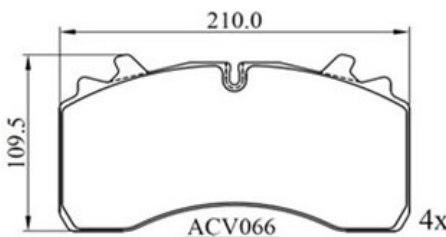

Comparative Wear Of C.V. Disc Pads
