

Press Release

29 November, 2022

Orders open for new IVECO S-WAY

IVECO Dealers have started taking customer orders for the award-winning S-WAY range, with the first of these vehicles expected to arrive in Australia during the first half of 2023.

IVECO Australia is now in the final stages of local validation and testing of the new range, which has seen several models in rigid, single trailer and B-Double configuration travel the country under full working conditions, accumulating thousands of kilometres. As part of the program B-Double variants also operated for extended periods at full 70t GCM to ensure the reliability and robustness of the vehicles.

Available in the S-WAY line-up are 4x2 and 6x4 prime movers and rigids in 6x2, 6x4 and 8x4 configurations. Three Euro 6-rated engines will be offered across the line-up with five output options, delivering power and torque that spans from 340hp (251kW) and 1400Nm to a range-topping 550hp (419kW) and 2500Nm.

Coupled to the engines is IVECO's highly regarded HI-TRONIX automated manual transmission in 12 and 16-speed guise, ensuring seamless gear changes, torque optimisation and an extended operating life.

Other features of the driveline include anti-idling capabilities and ECO MODE PLUS, functions that reduce fuel use.

Also assisting fuel efficiency and reduced operating costs is the S-WAY's extremely aerodynamic cabin design. A reshaped roof, optimised mirror design, high efficiency A-Pillar covers, and a host of other new styling introductions has resulted in a cabin that provides a 13.5% CX coefficient improvement over previous heavy duty IVECO models.

As a leader in safety, IVECO will continue to deliver a wide range of active and passive technologies in the S-WAY including emergency braking, adaptive cruise control, lane departure warning system and an even stronger reinforced ECE R29.03-compliant cabin.

Inside the cabin functionality meets comfort, with an ergonomic dash and cluster layout, abundant storage and a raft of new driver appointments. Also new is IVECO DRIVER PAL, which is available in the top spec 550hp model. IVECO DRIVER PAL is a technology that allows drivers to fully interact with their vehicles and operate all in-cabin controls through voice commands.

Further S-WAY details will be provided closer to launch date.

ends

Iveco Group Australia

IVECO is a proud manufacturer and importer of commercial vehicles spanning the light, medium and heavy duty truck segments and also has a range of minibuses. The commercial vehicle range includes on and off-road models from car licence vans through to prime movers rated up to 70 tonnes GCM and minibuses from 11 seats to 21 seats. All models are designed and tested to meet Australia's demanding operating requirements. The extensive product line-up includes Daily, Eurocargo, ACCO, Stralis, X-Way, Trakker and Astra models. IVECO vehicles are supported in Australia by a dedicated network of over 60 dealerships and parts and service outlets strategically located nationwide, offering aftersales services that include extended warranties, breakdown support packages and personalised maintenance contracts.
