1 May, 2023

## **On-road or off – IVECO to showcase range versatility at Brisbane Truck Show**

*Attendees at this year's Brisbane Truck Show will be given a glimpse of IVECO's model breadth across both on and off highway applications, with a display spearheaded by two of its latest releases, the heavy-duty S-Way and rugged new T-Way, which has been developed for the toughest off-road applications.*

Representing the S-Way at the show in the model's first official public appearance will be two prime mover models, an AS (Active Space) 550 and AT (Active Time) 460.

Featuring advanced, high efficiency Euro6 (Step E) engines, market-leading Hi-Tronix automated transmissions and an abundance of active safety equipment, these models offer the latest in efficiency, comfort and technology from IVECO.

Available in a variety of configurations and in both prime mover and rigid variants, S-Way is ideal for a range of urban, metro, intra and interstate delivery tasks.

As well as being extremely functional and offering low total cost of ownership benefits to fleet managers and owners, the new S-Way range is easy to identify with its sleek, contemporary styling and purposeful on-road presence. Along with looking the part, the new cabin delivers considerable aerodynamic advantages compared to previous IVECO heavy-duty models with these enhancements representing an improved 13.5 per cent Cx (drag coefficient) which can result in fuel efficiency increases of up to 3 per cent on long haul routes.\*

Joining the S-Way on stand in Brisbane will be IVECO's latest off-road model, the T-Way, which replaces the Trakker range.

T-Way is available in 4x4, 6x6 and 8x4 configurations and shares many innovations and technology advancements featured in S-Way, including Euro6 (Step E) engines, Hi-Tronix transmissions and safety equipment such as Electronic Braking System (EBS), ABS and ASR (Anti-Skid Regulator) and Hill Holder.

These models also feature Daytime Running Lamps, LED headlamps (with cornering fog lights), transmission interarder and engine brake, and a tough ECE-R29.03 certified cab. An optional Lane Departure Warning System and Tyre Pressure Monitoring System are also available.

The display vehicle is a 4x4 variant that boasts a host of off-road systems including full-time 4x4, hub reduction to all axles and front, centre and rear differential locks to provide superior traction in slippery conditions. A two-speed transfer case also delivers excellent tractability in low range, allowing T-Way to overcome steep ascents and descents easily and safely.

Further aiding off-road capabilities is a generous 33° approach angle, front parabolic suspension with dampers and stabiliser bar, and rear 3-Leaf parabolic suspension with stabiliser bar, which provides outstanding articulation while smoothing out the bumps.

To experience the new S-Way and T-Way ranges first-hand, please visit IVECO at stand 58 at this year's Brisbane Truck Show. An additional IVECO S-Way prime mover will also be exhibited at the South Bank Truck Festival.

*\*Application dependent.*

## ends

### Iveco in Australia

*IVECO is a proud distributor and importer of commercial vehicles spanning the light, medium and heavy duty truck segments. The commercial vehicle range includes on and off-road models from car licence vans through to prime movers rated up to 70 tonnes GCM. All models are designed and tested to meet Australia's demanding operating requirements. The extensive product line-up includes Daily, Eurocargo, ACCO, S-WAY, Trakker and Astra models. IVECO vehicles are supported in Australia by a dedicated network of over 60 dealerships and parts and service outlets strategically located nationwide, offering aftersales services that include extended warranties, breakdown support packages and personalised maintenance contracts.*
